- Meagre: 1.000 metric tonnes
- Fish feed: 260.000 metric tonnes

Life begins with water...

MEDITERRANEAN.

Mediterranean Sea is like an enormous lake, almost completely enclosed by land. Romans called it 'Mare Magnum' which means Great Sea. Only accessible from Atlantic Ocean through Gibraltar Strait and from the Red Sea through Suez Canal. Because of it is enclosed by land, Mediterranean sea is protected from extreme weather conditions.

It is rich in nutrients and provides outstanding growth conditions for fish.

PERFECT CLIMATE.

Mediterranean climate is unlike any other. Not always hot and limited to two seasons or continuously cold. Mild-cold winters slows growth rate, increases oil content and flavour of fish until it gets warmer when fish do thrive in these rich and clean waters. Mediterranean coasts host hundreds of millions of tourists every year due to its concordant conditions. And by far the number one in the worlds seas in tourism. Miles away off of those shores, we raise our fish.

DELICIOUS.

Superior tastes could only be found in superior conditions. Mediterranean fish is unique and superior in taste & flavour comparing to other whitefish.

NUTRITIOUS.

High in protein, low in sodium. Good source of Omega 3 , Calcium and Potassium.

SUSTAINABLE.

Certified ASC and Global GAP for aquaculture production. Gümüşdoğa FIFO (Wild fish in Farmed fish out) ratio is 0:1.

All Natural. No treatments, no antibiotics. Non-GMO.

AVAILABLE ALL YEAR ROUND

*Raised in
Mediterranean*
